### COVID trends

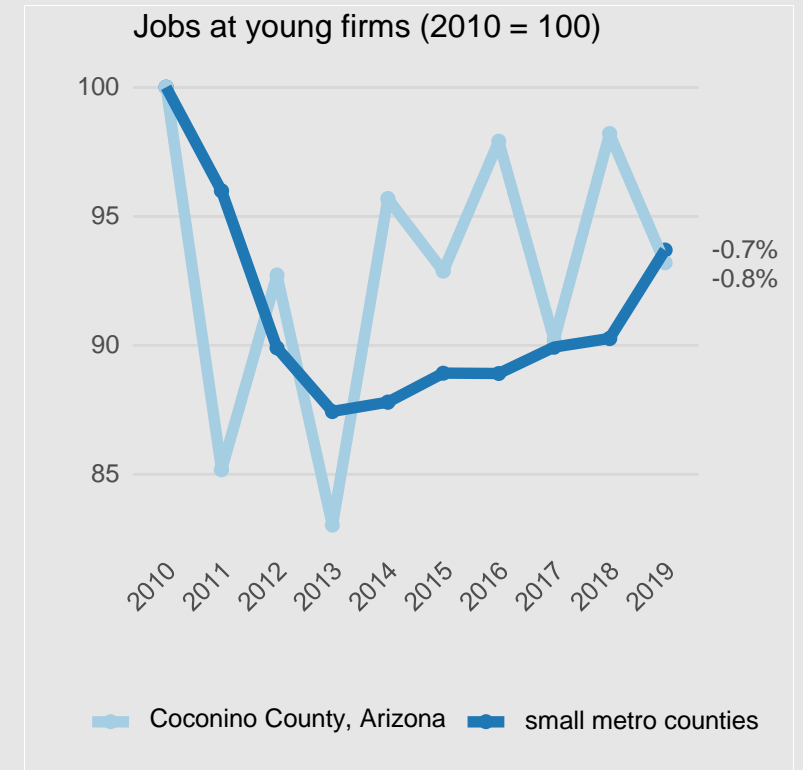

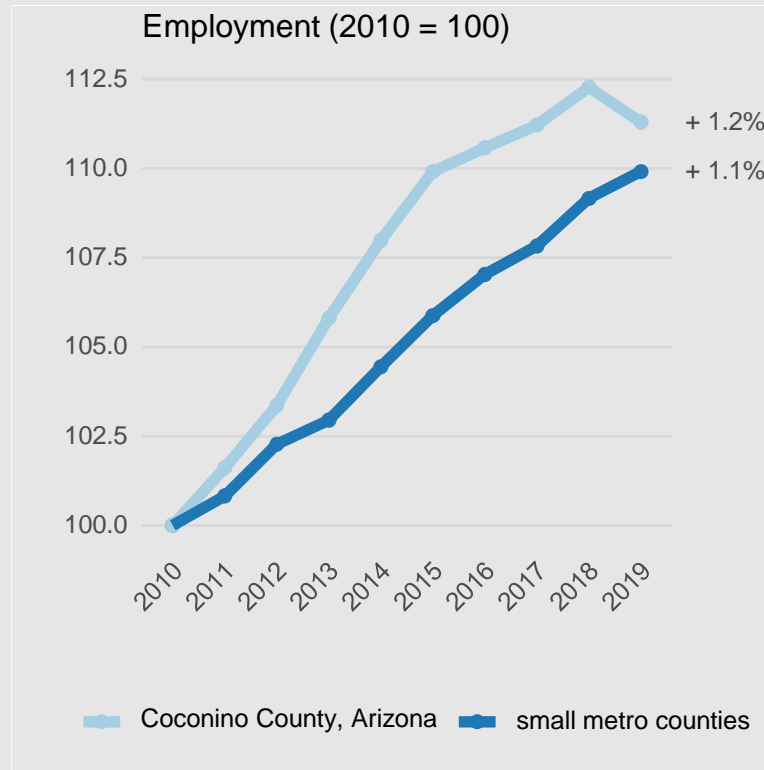

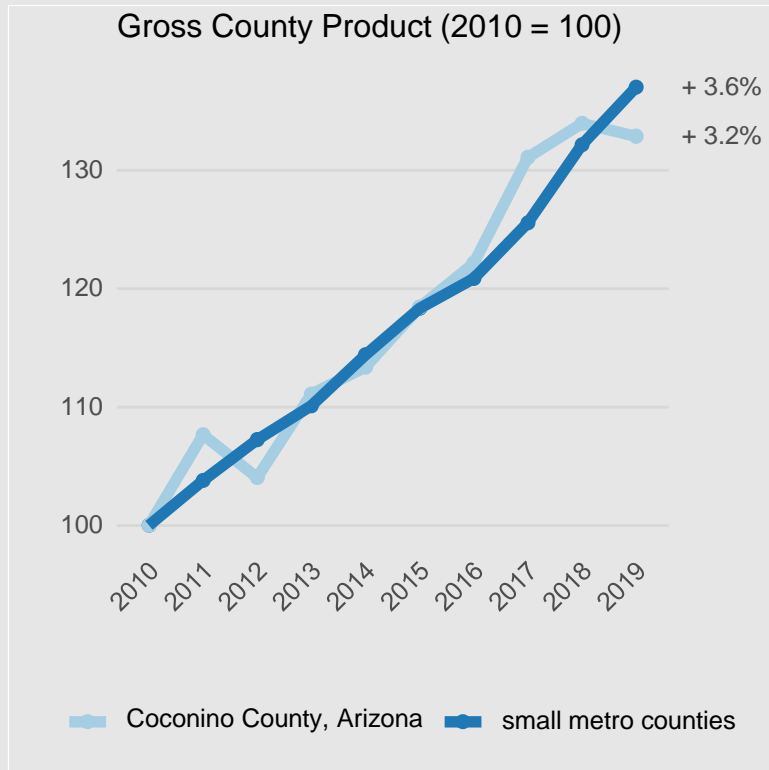

# Outcome

## Growth

Growth creates new opportunities for individuals. Entrepreneurship plays a critical role in growth, creating new jobs and new output; entrepreneurial activity can also indicate investors' confidence in future growth and prosperity.

Coconino County, Arizona made slight progress on economic growth from 2009 to 2019. Over the decade, the region lagged small metro counties' average on output, but experienced stronger employment growth. Local entrepreneurship experienced a sharp decline during the beginning of the decade but has slowly rebounded since 2013.

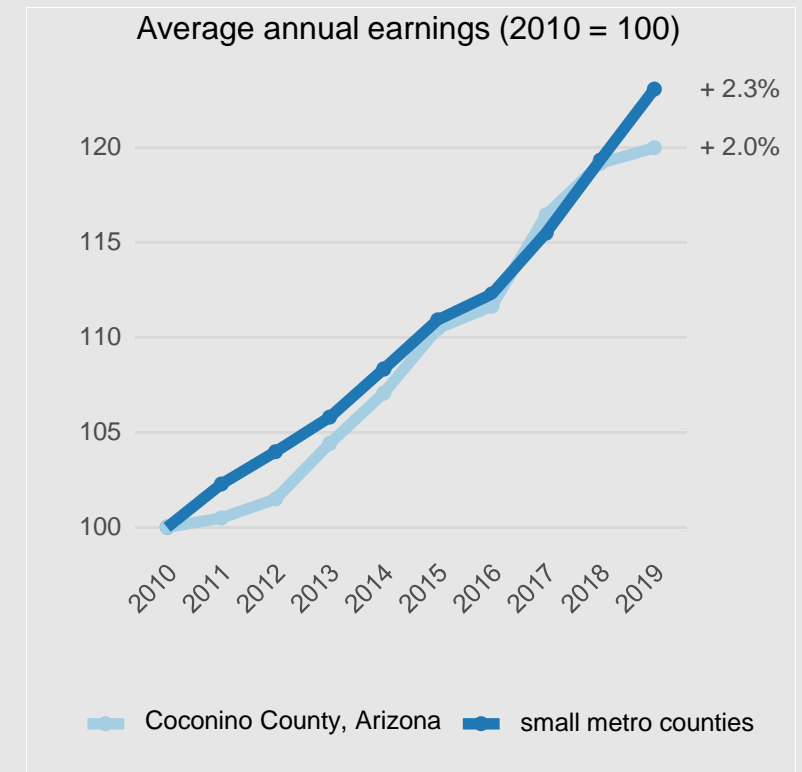

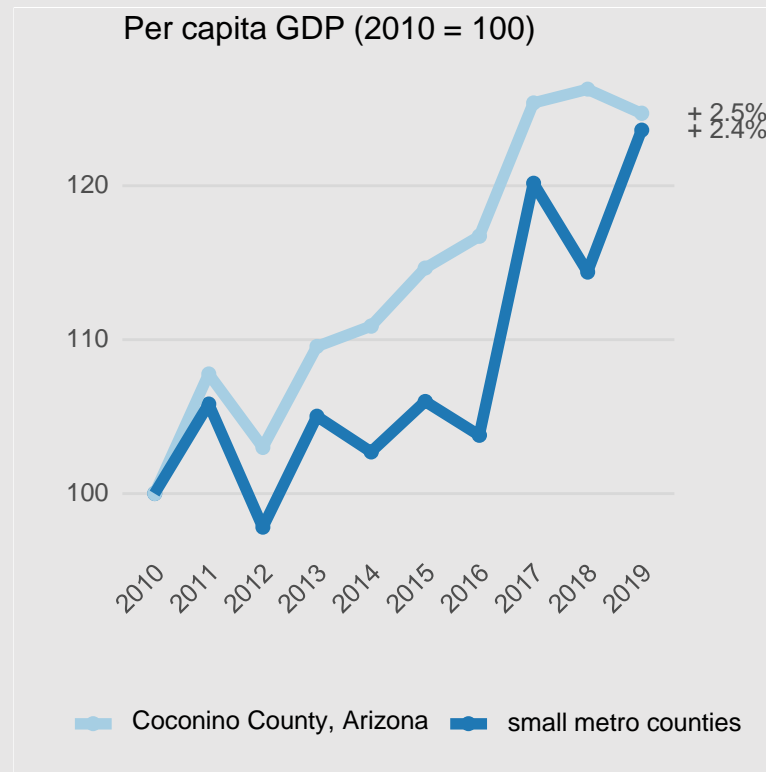

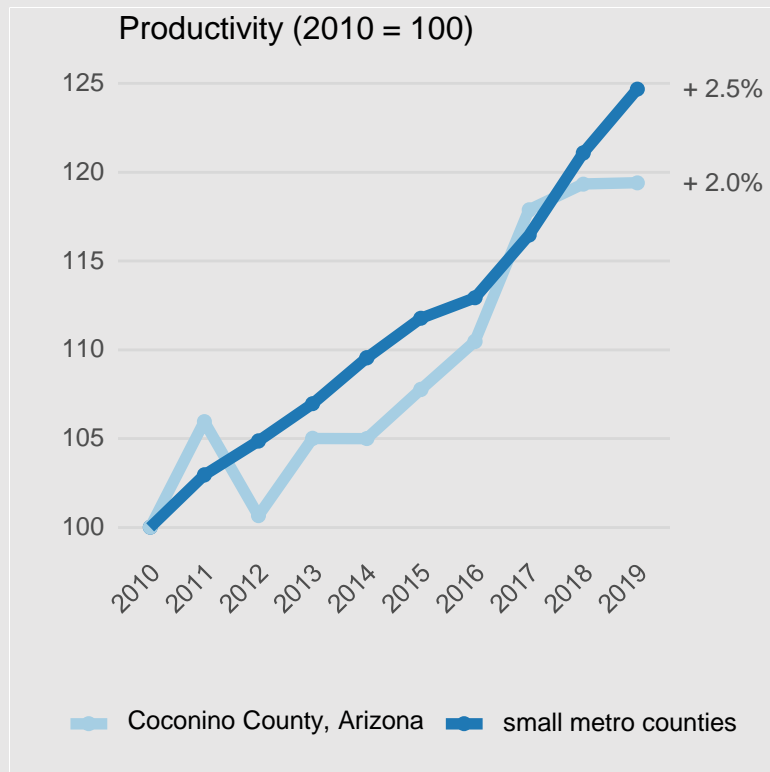

# Outcome

## Prosperity

When a county grows by increasing the productivity of its workers, through innovation or by upgrading workers' skills, for example, the value of those workers' labor rises. As the value of labor rises, so can wages. Increases in productivity and wages are what ultimately improve living standards for workers and families.

Coconino County, Arizona experienced rising prosperity from 2010 - 2019. Its GDP per capita growth is on par with the average growth of small metro counties, while its productivity growth and average annual earnings growth slowed down in recent years compared to other small metro counties.

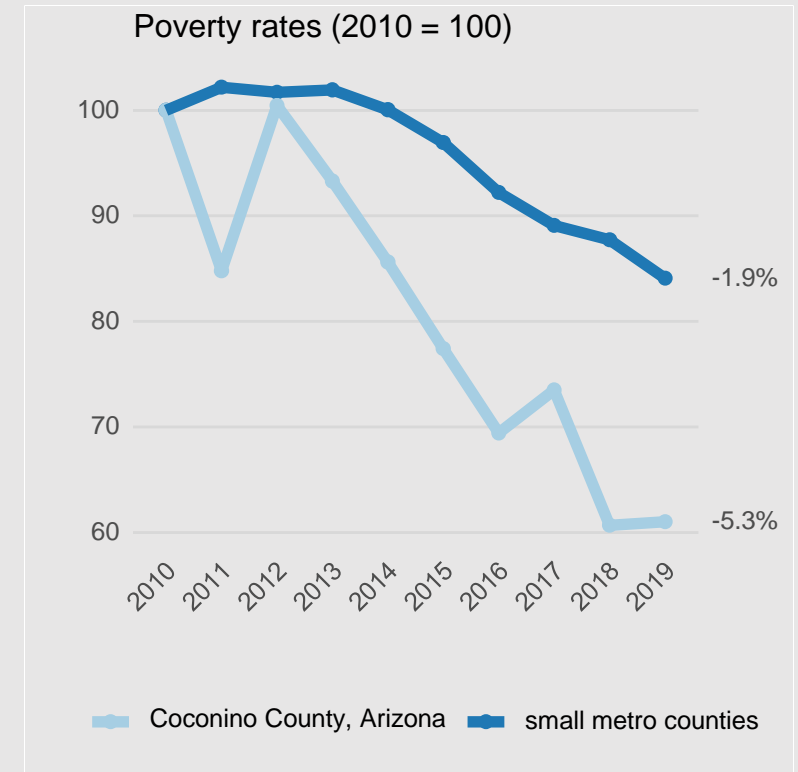

# Outcome

Inclusive growth enables more people to invest in their skills and to purchase more goods and services. Thus, inclusive growth can increase human capital and raise aggregate demand, boosting prosperity and growth.

Coconino County, Arizona experienced rising median earnings, employment rates, and declining poverty rates from 2010 to 2019. Poverty rates experienced a fast and steady decline since 2010.

## Inclusion

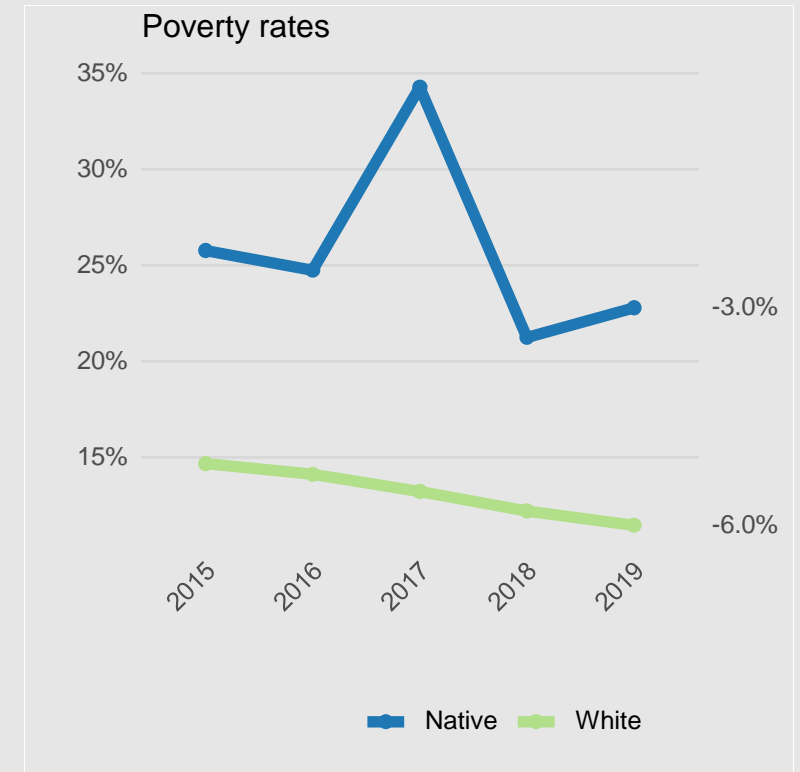

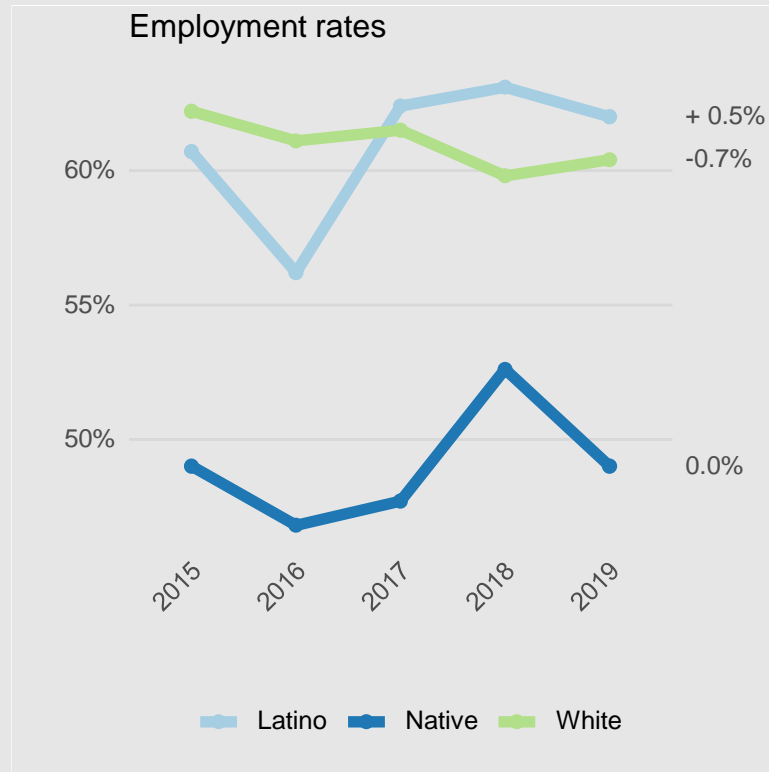

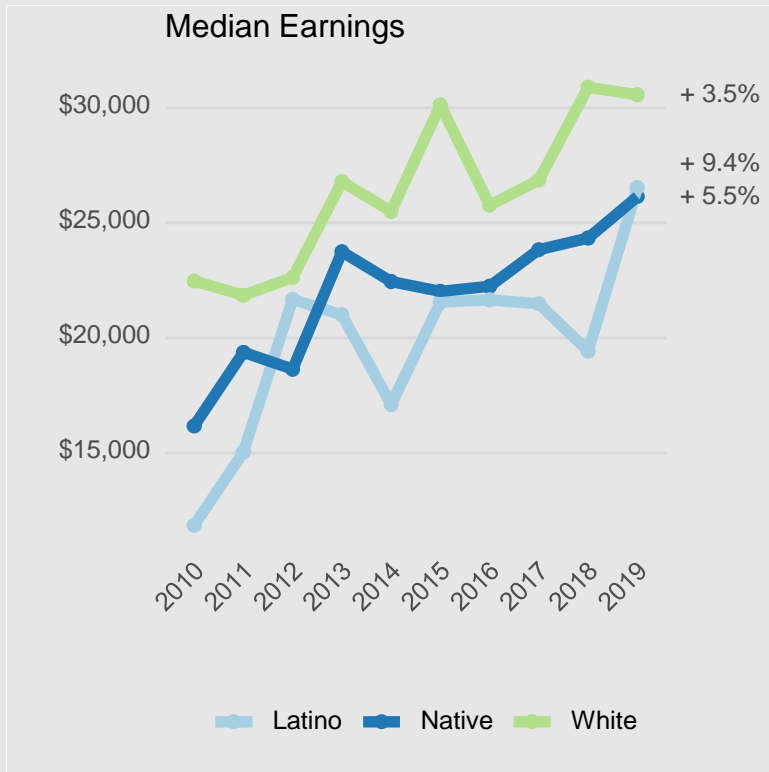

# Outcome

Racial inclusion measures if changes in inclusion expands or narrows the disparities among different racial and ethnic groups

Despite some progress on narrowing racial disparity gaps in Coconino County, Arizona from 2010 - 2019, significant disparities in median earnings, employment rates, and poverty rates persist among its white residents, Latinos, and Native Americans.

## Racial Inclusion

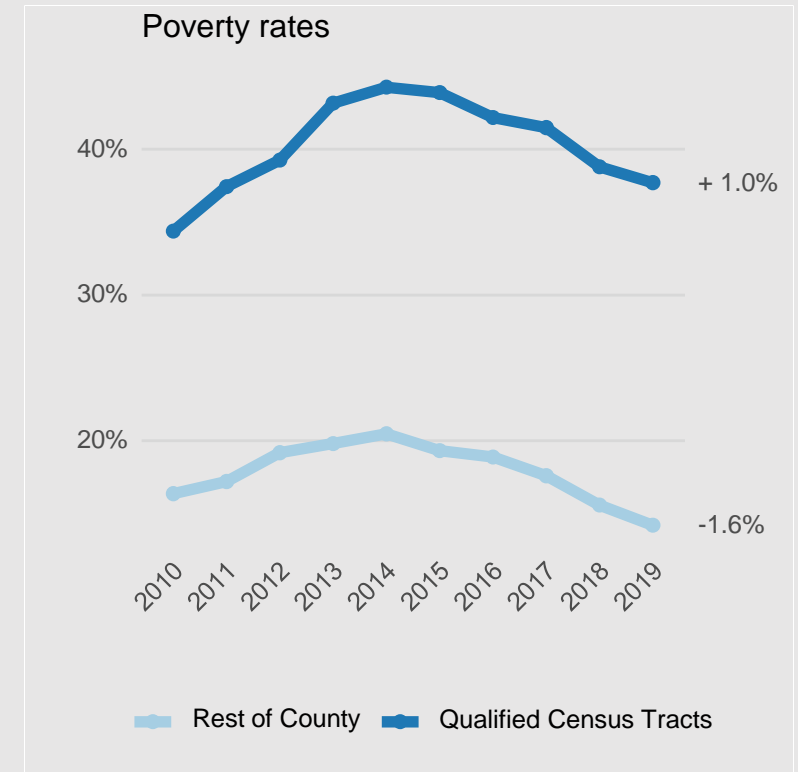

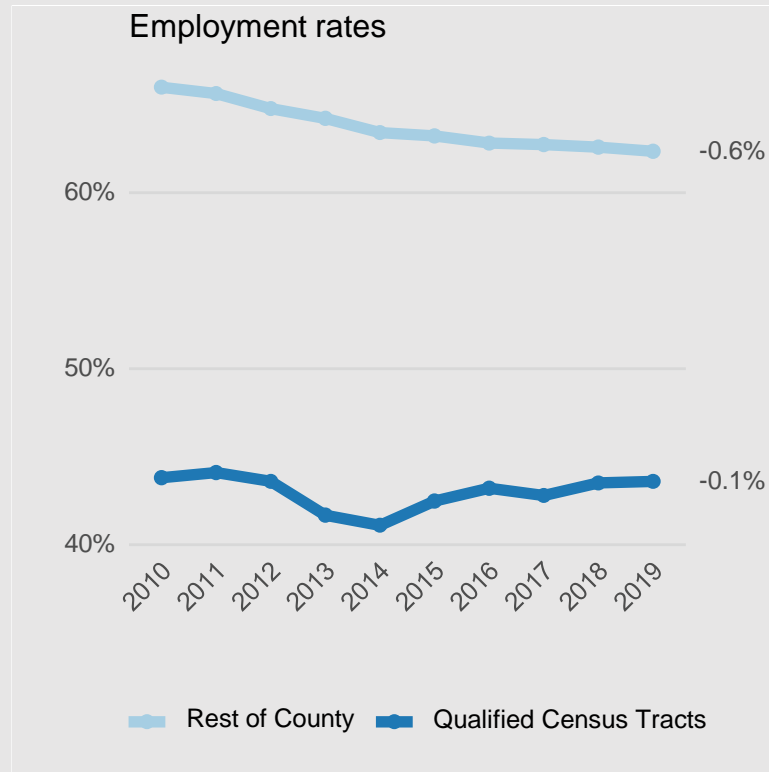

# Outcome

Neighborhood inclusion measures if changes in inclusion expands or narrows the disparities between qualified census tracts and the rest of the county

Economic disparities between qualified census tracts and the rest of Coconino County, Arizona remain large. The gap expanded in median earnings and poverty rates, and narrowed slightly in employment rates.

## Neighborhood Inclusion

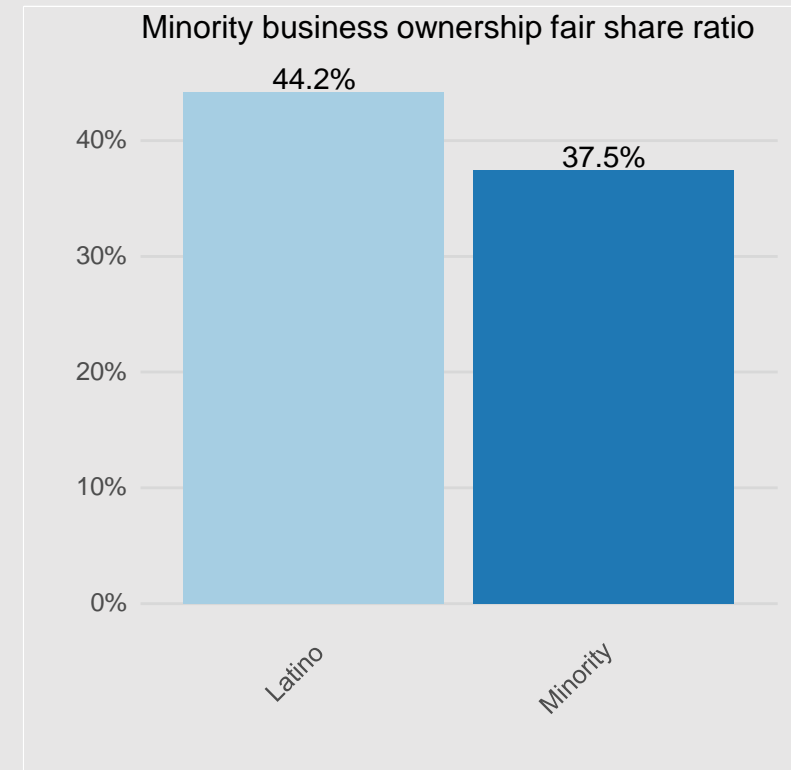

# Drivers

## Job Creation and Quality Business Growth

Coconino County, Arizona saw a decline in its share of jobs in tradable sectors - those that pay higher wages and drive productivity growth.

The ratio of business ownership share to population share is only 37% for minorities.

# Drivers

## Job Preparation and Wage Gains

Secondary and post-secondary educational attainment is rising across the board in the county. But large gaps persist in education attainment among different racial and ethnic groups, and between neighborhoods.

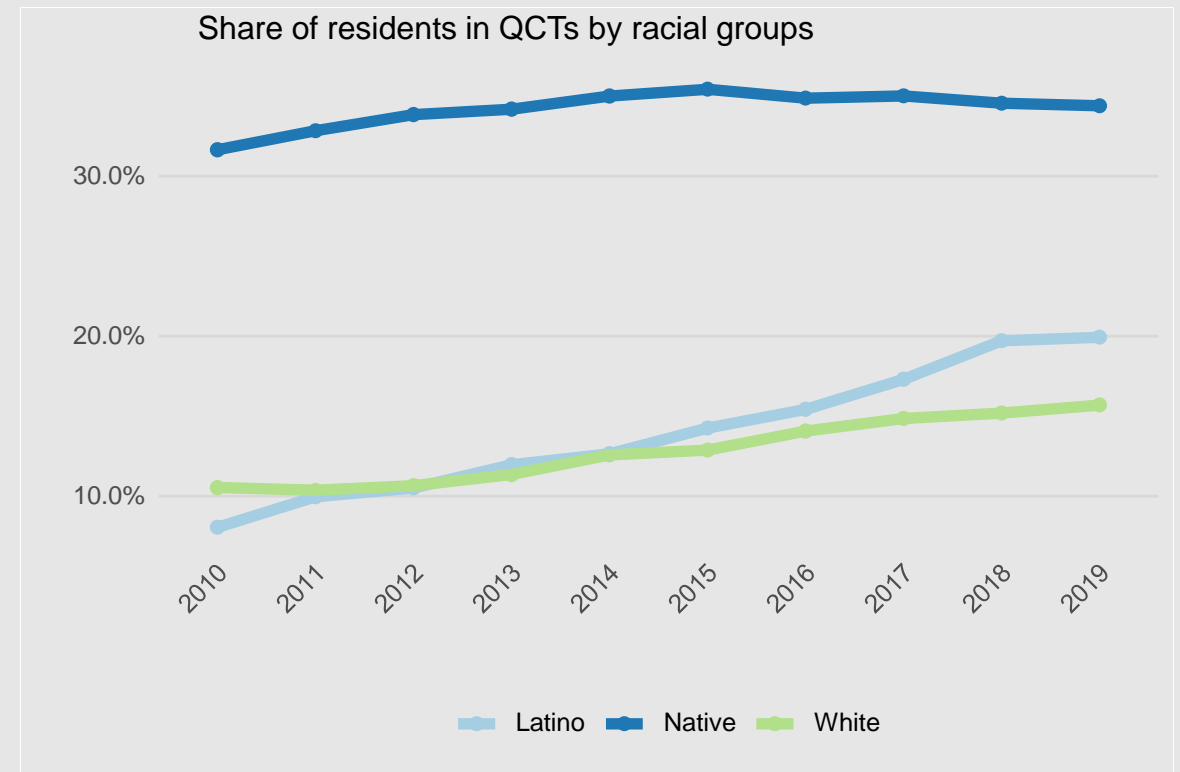

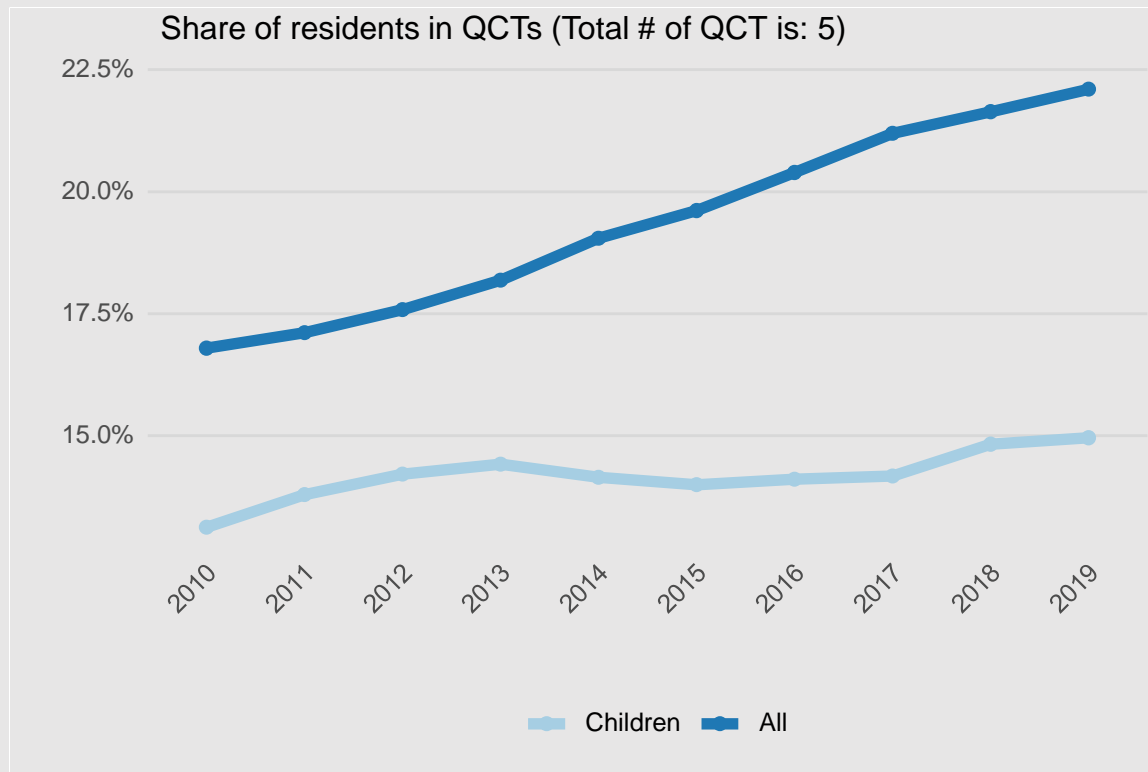

# Drivers

## Vibrant, Connected Communities

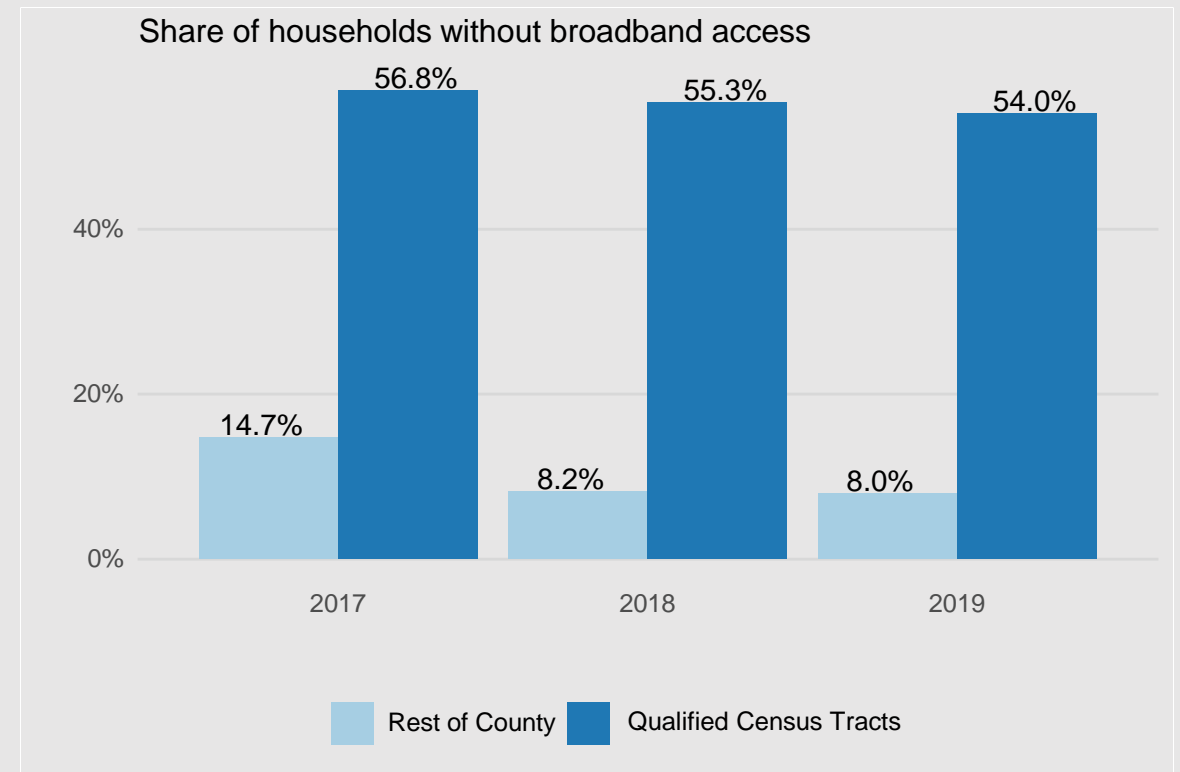

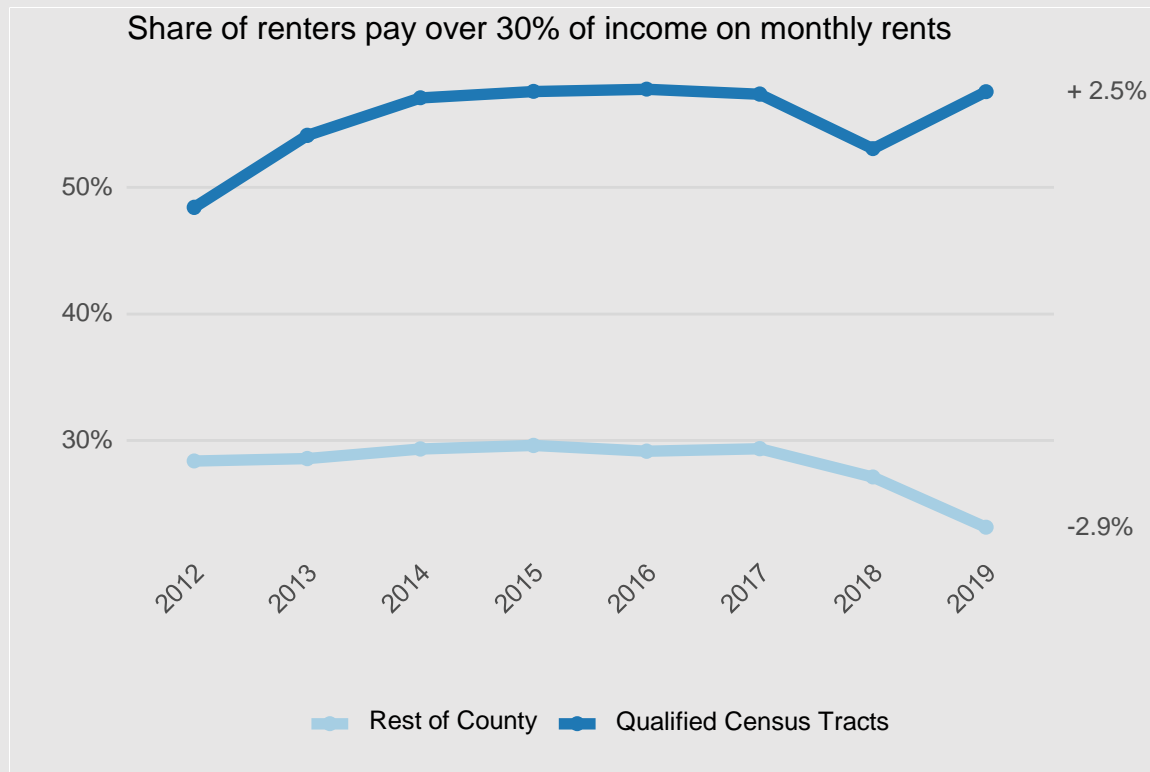

Share of Coconino County residents living in a qualified census tract has been on the rise in the past decade, reaching about 22% in 2019. In particular, more than 30% of Native American live in a qualified census tract, compared to about 20% of Latino residents and 15% of white residents do.

# Drivers

## Vibrant, Connected Communities

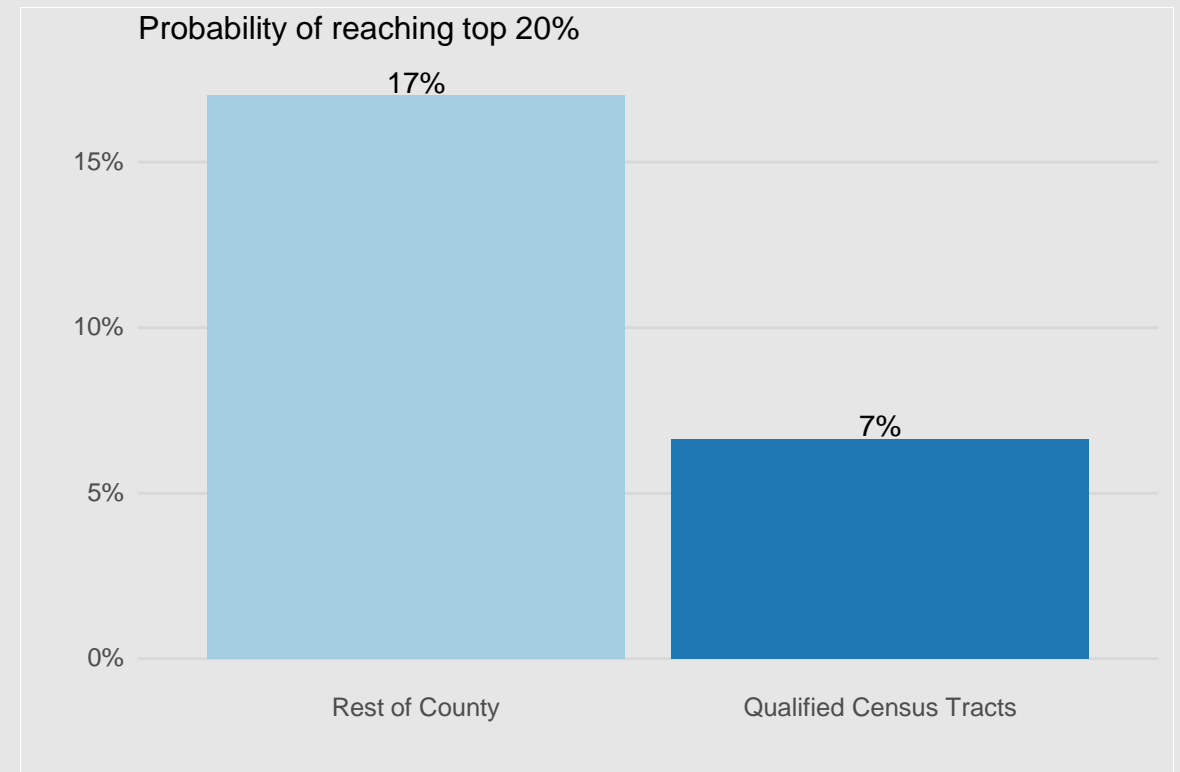

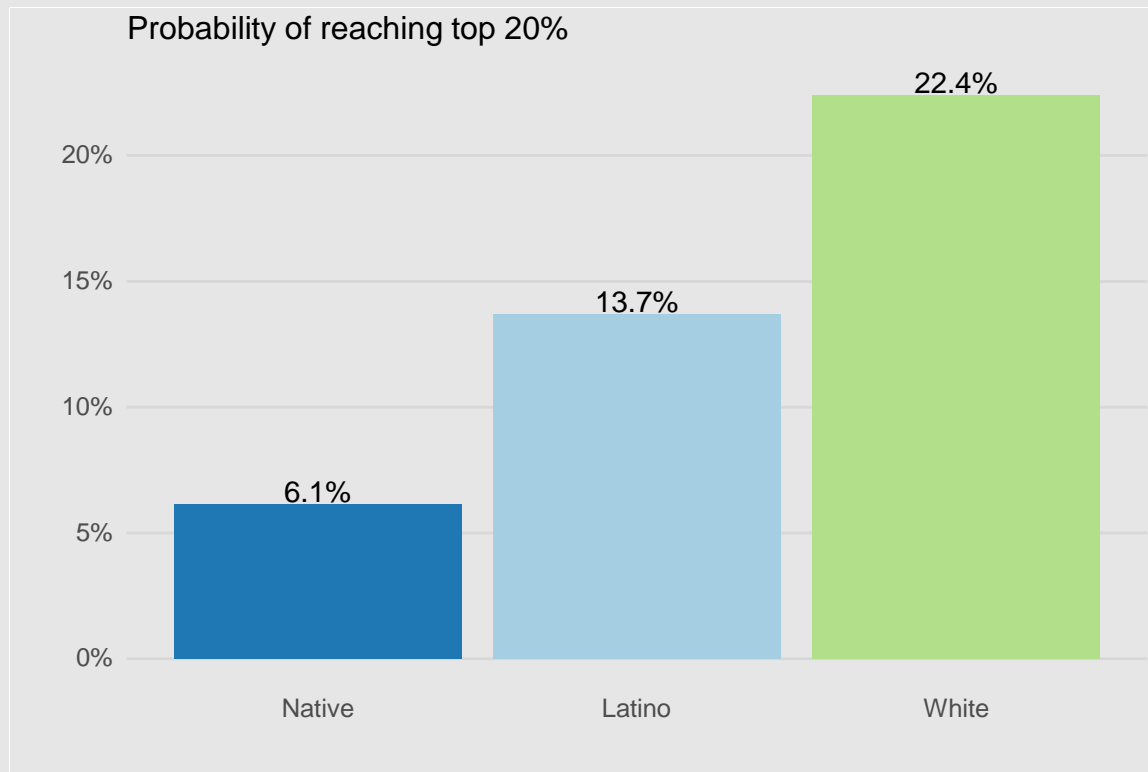

Rent-burdened households increased in the past decade. More than 50% of renters living in qualified census tracts are rent-burdened, meaning they pay over 30% of their monthly income on rent. There are 54% of households in qualified census tracts without broadband access, with little improvements in the past three years.

# Drivers

## Vibrant, Connected Communities

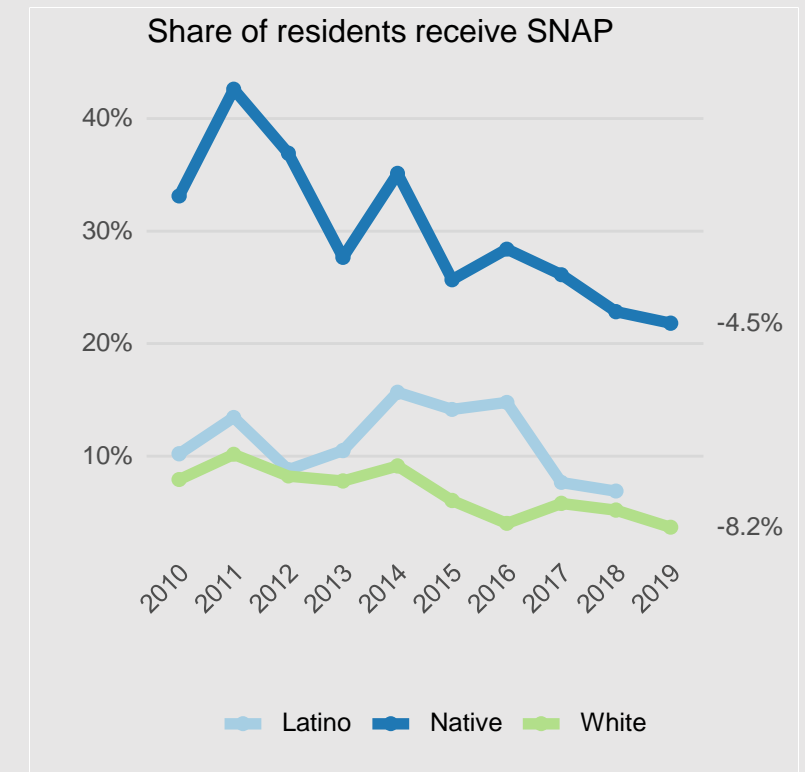

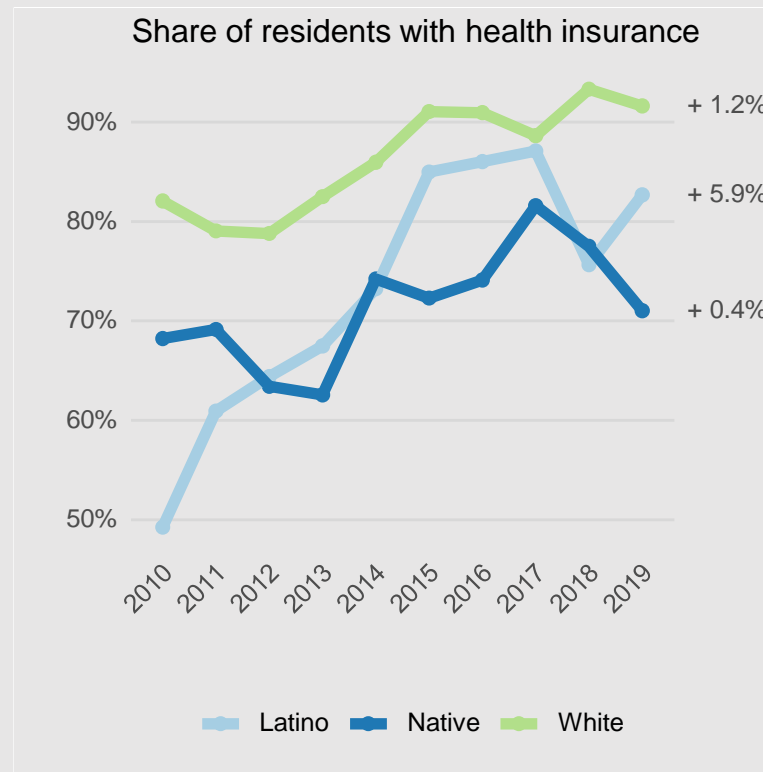

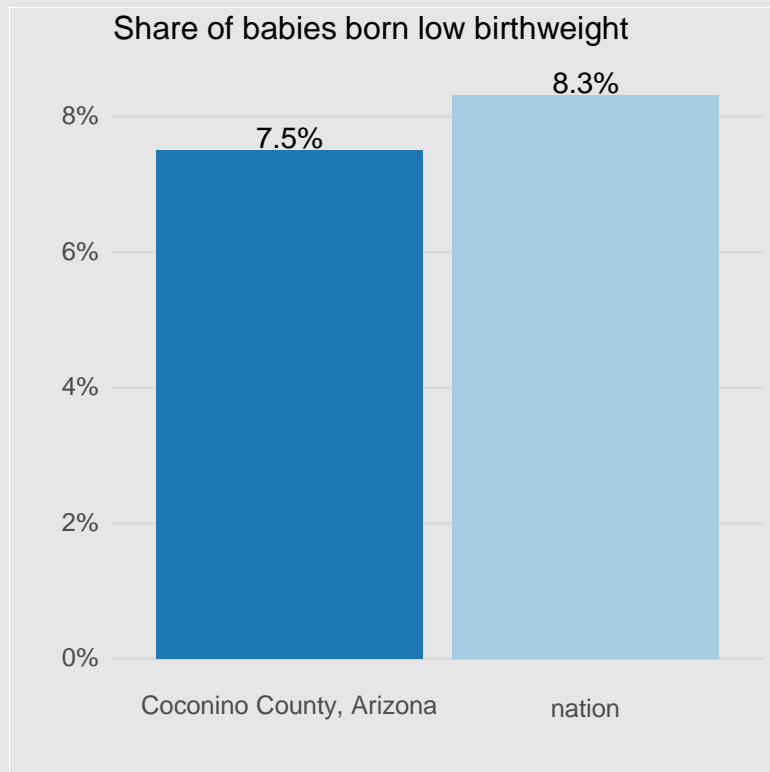

In Coconino County, Arizona, children's chances of reaching the top 20% of income distribution varies significantly by their racial and ethnic backgrounds, and the neighborhood they grew up in. Children in white families are three times more likely to reach the top 20% than children who grew up in a Native American family.

# Enablers

## Public Health and Safety

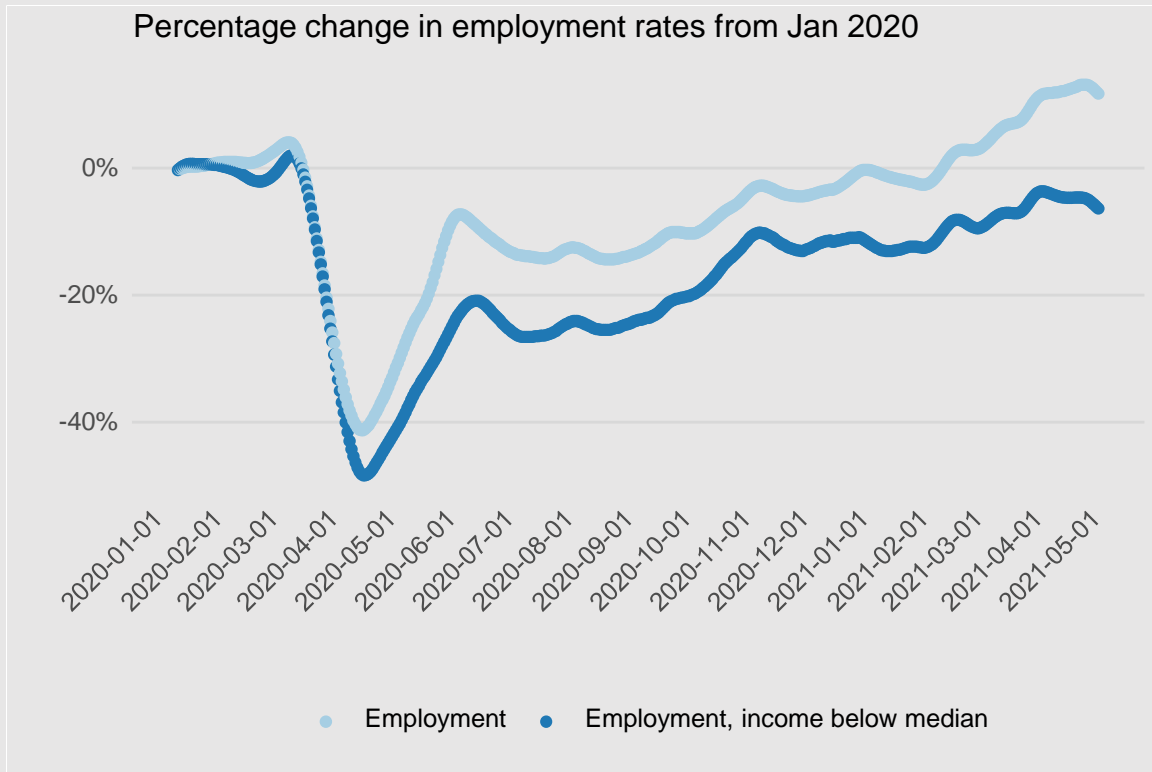

Health care coverage and food security has improved for all racial and ethnic groups. Yet, Native Americans and Latinos are much less likely to have health insurance coverage, and more likely to be food insecure and receive SNAP benefits.

# Pandemic Trends - Outcomes

## Growth

Employment rates for all workers have recovered compared to January 2020, but employment rates for low-income workers remain lower than pre-pandemic levels. The number of unique job postings in the county experienced a slight decline in the first half of 2020, but quickly recovered and grew rapidly since then.

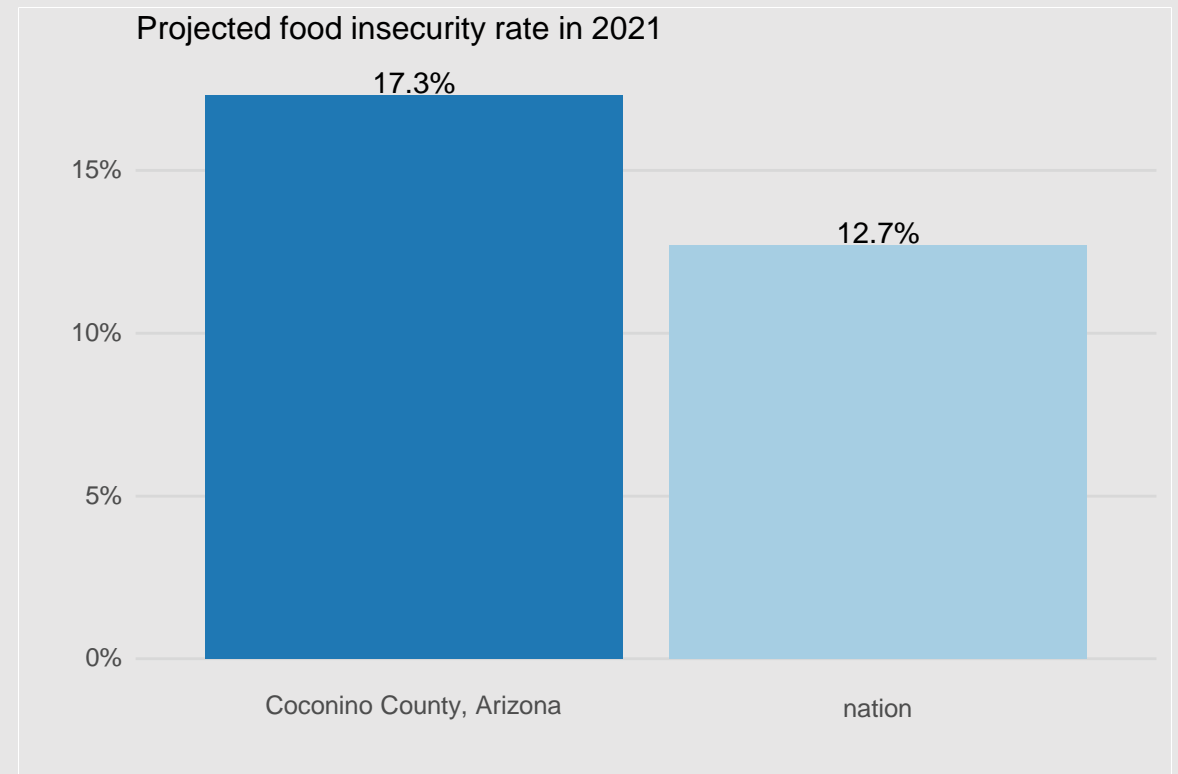

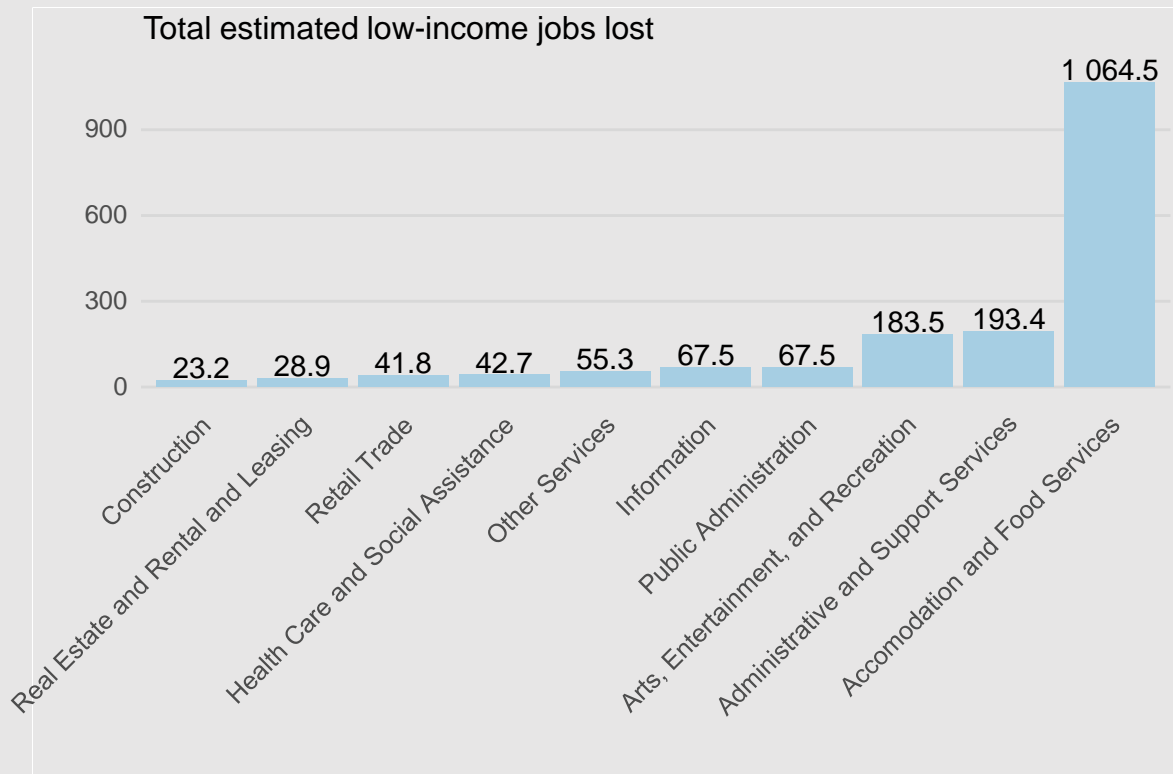

# Pandemic Trends - Outcome

## Inclusion

In Coconino County, Arizona, the largest low-income jobs lost is in Accommodation and food services sector, followed by administrative and support services, and arts.

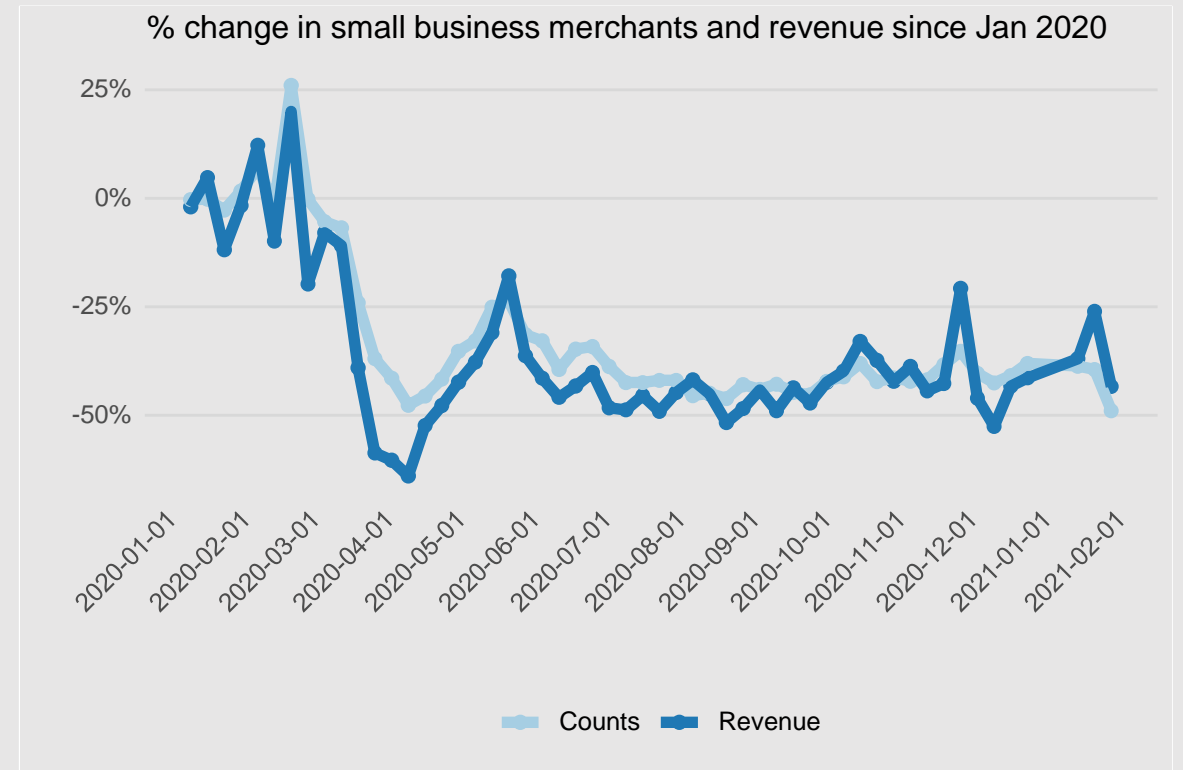

The county has a higher projected food insecurity rate than the national average.

# Pandemic Trends - Drivers

## Quality Job Creation

Coconino County, Arizona's growth in new business applications is slower than the small metro counties average, and did not experience the surge in 2020 as other small metro counties. The number of active small business merchants and overall small business revenue is still 50% lower compared to the pre-pandemic level.

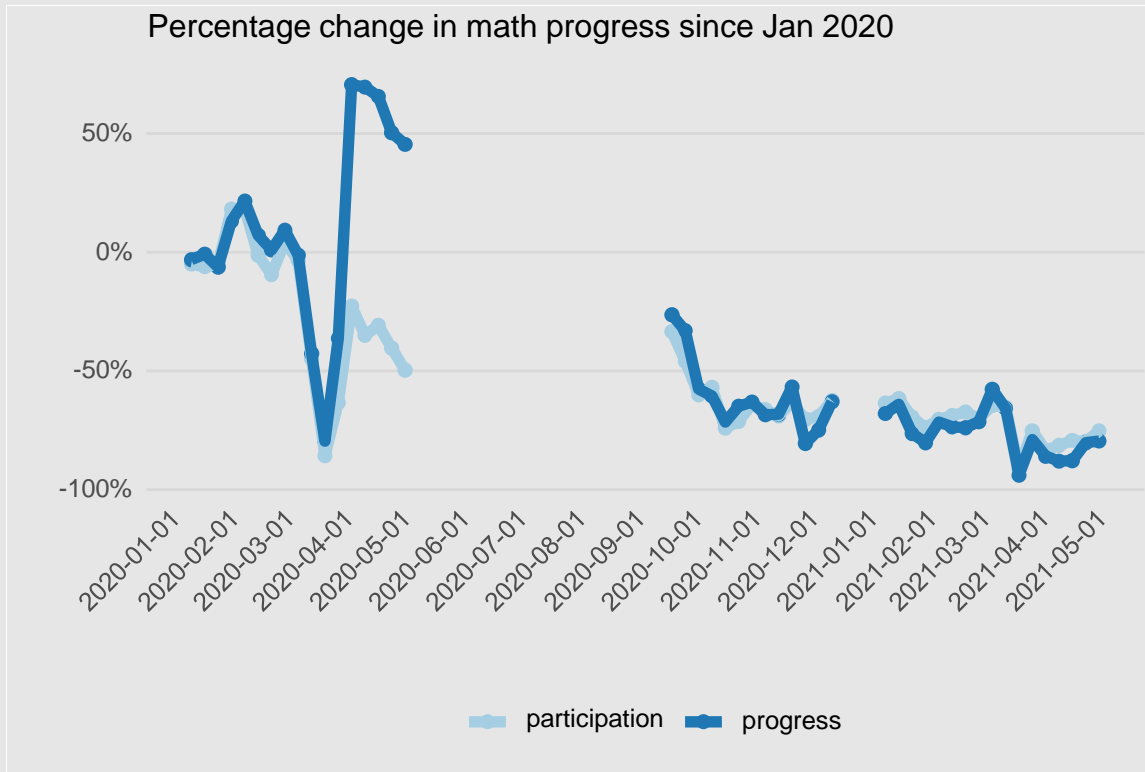

# Pandemic Trends - Drivers

Job Preparation and Wage Gains | Quality Vibrant Neighborhoods

Student participation and progress in online math coursework has declined over 50% from Jan 2020.

On housing, active listings are in short supply, with a more than 50% decline from same month last year. Median listing price has increased over 25% for the same period.

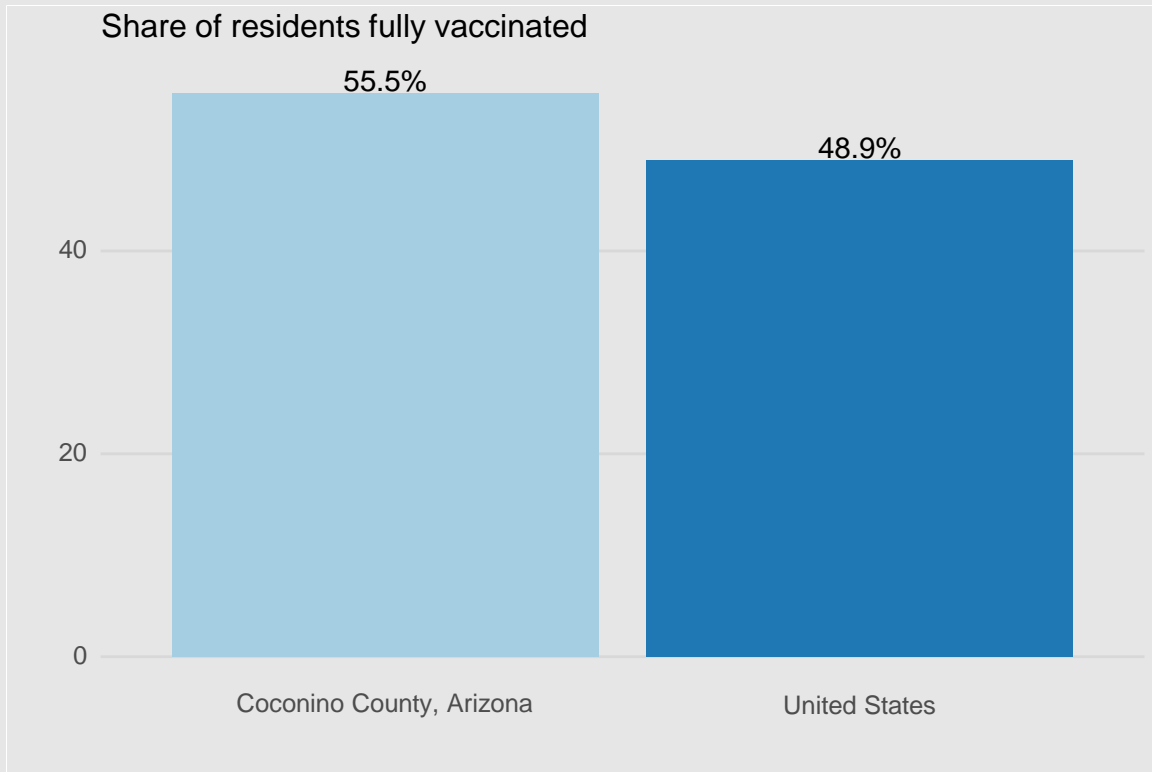

# Pandemic Trends - Enabler

## Health and Public Safety

The share of the population fully vaccinated in Coconino County, Arizona is 55.5% as of July 8, 2021, slightly higher than the U.S. average.

# Appendix | Outcome

**Growth** indicators measure change in the county's economy and the economy's level of entrepreneurial activity.

- **Jobs** measure the total number of occupied full- and part-time wage and salaried employment positions in a county.

*Source: EMSI estimates*

- **GDP** measures the total value of goods and services produced in a county, including wages and profits.

*Source: U.S. Bureau of Economic Analysis*

- **Jobs at young firms** captures the total number of full- and part-time wage and salaried jobs at young, private-sector firms age five years. It reflects the employment impact of entrepreneurship in a county.

*Source: U.S. Census Bureau Quarterly Workforce Indicators*

**Prosperity** indicators capture changes in the average wealth and income produced by an economy.

- **Standard of living** equals GDP divided by total county population (GDP per capita), which reflects a county's average standard of living.

*Source: U.S. Bureau of Economic Analysis and U.S. Census Bureau*

- **Productivity** equals GDP divided by the total number of jobs, a crude measure of a county's overall productivity.

*Source: EMSI estimates and U.S. Bureau of Economic Analysis*

- **Average annual wage** equals aggregate annual wages paid to workers divided by the total number of jobs.

*Source: EMSI estimates*

**Inclusion** indicators measure how the benefits of growth and prosperity in a county—specifically, changes in employment and income—are distributed among individuals.

- **Median earnings** measures the annual wage earned by the person in the middle of a county's income distribution (among people at least 16 years old).

*Source: U.S. Census Bureau American Community Survey*

- **Poverty rate** measures the share of population below federal poverty line.

*Source: U.S. Census Bureau American Community Survey*

- **Employment rate** measures the share of individuals ages 18 to 64 who are currently employed.

*Source: U.S. Census Bureau American Community Survey*

# Appendix | Drivers

## Job Creation and Quality Business Growth

- **Share of struggling families** equals number of families with children whose wages were not high enough to cover their cost of living, as share of all families with children in the enclosing metropolitan area.  
*Source: U.S. Census Bureau ACS Microdata*
