

Powering Progress for Arizona

Advanced business, technology and manufacturing industries are choosing to call Arizona home. One of the reasons is reliable energy with a range of service options for every size business opportunity.

Our economic development team stands ready with the tools, resources and knowledge to help.

We work with state, county, regional and municipal economic development organizations to attract and stimulate business investment that creates jobs and supports a healthy economy. As part of our commitment to grow local economies and support small businesses, we partner with these groups to provide free resources and services to local communities.

ARIZONA PROSPECTOR

Thinking about moving your business to Arizona or selecting a new site for your operations? Our Arizona Prospector website provides up-to-date community and region-specific data on labor force demographics, wages, top industries, business clusters, consumer spending, education levels, transportation and housing. You'll also find information on office, industrial and retail building and land availability for a comprehensive look at communities and regions around the state. All great tools to help you make a smart decision for your business.

SIZEUP YOUR BUSINESS

SizeUp Arizona provides small-to-medium sized businesses and entrepreneurs around the state with the market research and data analytics necessary to better understand competition and fine-tune their business model for success. The site provides the ability to research costs, revenue, customers, location and marketing strategy scenarios comparative to similar businesses around Arizona or the U.S.

MAKE THE NEXT MOVE

The Next Move Group provides tools for local communities to address multifaceted economic development needs such as prospecting, talent attraction, building and site development, and board training. Additionally, it provides access to resources and research on the latest trends and innovative solutions for small to medium-sized economic development organizations and rural communities to position themselves for success in an ever-evolving landscape.
